

 **SAMPIERANA**

U/C SPARE PARTS

Concrete solutions. Always.

THE COMPANY

Sampierana U/C Spare Parts, is synonym of excellence in the undercarriages spare parts distribution designed to provide superior performance, durability and reliability on all types of terrain for construction equipment machines of all sizes. Covering 12,000 m² (of which 8,000 m² covered), our Warehouse in Modena (IT) is strategically located for ease of logistics in order to guarantee rapid dispatch to our clients

and dealers throughout Europe and the rest of the world. We are authorized **Berco** dealer since 1976. Thanks to the knowledge and experience gained, in 2007 we created a complementary line of components for tracked machines under our brand name **Sampierana**®. From 2021, we become part of **CNH Group**, thus becoming a global brand that supports customers all around the world.

Why choose Sampierana U/C Spare Parts?

- Extensive stock of products to ensure immediate availability.
- Dedicated team always available to guarantee rapid and qualified response.
- Technical expertise.
- Aftersales support.
- Attention to details and passion for what we do.

RUBBER PADS CHAIN ON

Made of superior quality rubber, these pads, mounted directly on the chain, reduce vibration to protect paved or fragile surfaces.

RUBBER PADS CLIP ON AND BOLT ON

Available as Clip on or Bolt on, these pads greatly enhance to versatility of the machine. Allowing a traditional steel undercarriage to be configured with rubber pads allows the machine to access sites with less ground disturbance.

RUBBER TRACKS

High quality, guaranteed by selecting the best quality product from various suppliers for every style and dimension of track, ensures greater peace of mind thanks to longer warranty periods.

IDLER

The front idler guides the track chain. The idler group includes the shock absorber assembly, which helps to ensure the correct tension in the undercarriage.

UPPER ROLLER

The upper rollers support the weight of the chain at the top and support the idler in keeping the chain itself with the correct tension, ensuring continuous and stable traction.

TRACK GROUP

Provide powerful traction and exceptional wear resistance, keeping the machine operational even in the most demanding environments, such as rocky, muddy or abrasive soils.

TRACK SHOE

Track shoe with different bar configurations (one, two, or three bars) can be used in various sectors, mainly agricultural and industrial, to suit different work requirements, offering solutions that can be customized to meet specific needs.

LOWER ROLLER

They ensure smooth movement of the undercarriage. They play a fundamental role in supporting and distributing the weight of the machine.

SPROCKET

The heart of undercarriage movement, transmitting engine power to the tracks.

CNH

Concrete solutions. Always.
