

 **SAMPIERANA<sup>®</sup>**

U/C SPARE PARTS

Concrete solutions. Always.

# THE COMPANY

**Sampierana U/C Spare Parts**, is synonym of excellence in the undercarriages spare parts distribution designed to provide superior performance, durability and reliability on all types of terrain for construction equipment machines of all sizes. Covering 12,000 m<sup>2</sup> (of which 8,000 m<sup>2</sup> covered), our Warehouse in Modena (IT) is strategically located for ease of logistics in order to guarantee rapid dispatch to our clients

and dealers throughout Europe and the rest of the world. We are authorized **Berco** dealer since 1976. Thanks to the knowledge and experience gained, in 2007 we created a complementary line of components for tracked machines under our brand name **Sampierana**®. From 2021, we become part of **CNH Group**, thus becoming a global brand that supports customers all around the world.

## Why choose Sampierana U/C Spare Parts?

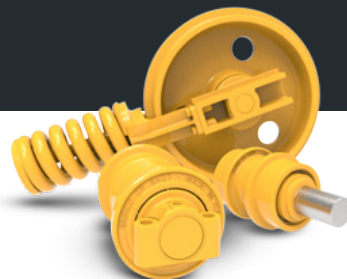

- Extensive stock of products to ensure immediate availability.
- Dedicated team always available to guarantee rapid and qualified response.
- Technical expertise.
- Aftersales support.
- Attention to details and passion for what we do.

SPARE PARTS**

**BERCO  
SPARE PARTS**

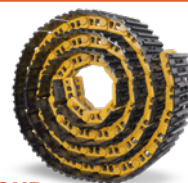

### **IDLER**

Designed to withstand heavy loads and severe working conditions, the Sampierana idler ensures smooth operation and longer undercarriage life.

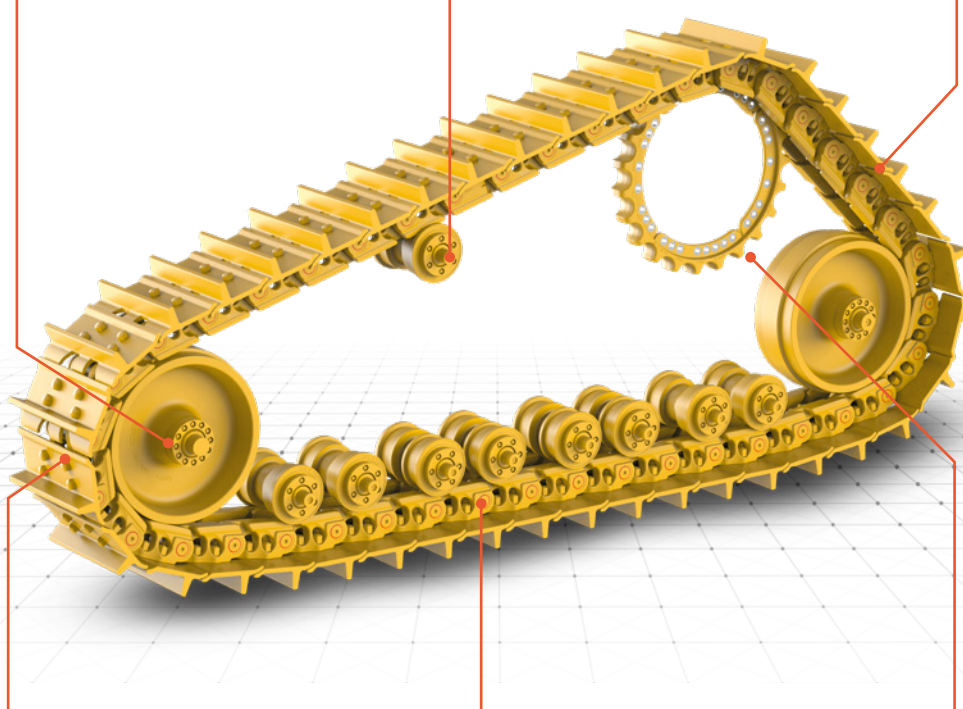

### **UPPER ROLLER**

Made with precision and durable materials, the upper rollers support the weight of the chain at the top and support the idler in keeping the chain itself with the correct tension, ensuring continuous and stable traction.

### **TRACK GROUP**

Provide powerful traction and exceptional wear resistance, keeping the machine operational even in the most demanding environments, such as rocky, muddy or abrasive soils.

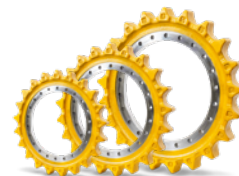

### **TRACK SHOE**

Track shoe with different bar configurations (one, two, or three bars) can be used in various sectors, mainly agricultural and industrial, to suit different work requirements, offering solutions that can be customized to meet specific needs.

### **LOWER ROLLER**

Play a crucial role in supporting and distributing the machine's weight. Top-tier Sampierana materials ensure long operating life and reliable performance.

### **SPROCKET**

The heart of undercarriage movement, transmitting engine power to the tracks. Sampierana's sprocket ensures high performance, smooth movement and reliability.

## **RUBBER PADS**

Made of superior rubber, these pads provide excellent grip and reduce vibration. They have been specifically designed to work and protect paved or fragile surfaces.

## **ROADLINER**

These versatile overlays transform steel chains into tracks, making them ideal for temporary applications in urban areas or on sensitive surfaces.

## **RUBBER TRACKS**

Sampierana rubber tracks offer exceptional traction, while also minimizing the risk of ground damage. They are perfect for working in urban environments or on sensitive surfaces.
